

Gene Expression: General and Cell-Type-Specific (Paperback)

Filesize: 8.09 MB

Reviews

*This ebook is fantastic. It is among the most awesome pdf we have study. You wont really feel monotony at at any time of your time (that's what catalogs are for regarding should you ask me).

GENE EXPRESSION: GENERAL AND CELL-TYPE-SPECIFIC (PAPERBACK)

To read **Gene Expression: General and Cell-Type-Specific (Paperback)** eBook, make sure you refer to the link below and download the ebook or have accessibility to other information which are in conjunction with GENE EXPRESSION: GENERAL AND CELL-TYPE-SPECIFIC (PAPERBACK) book.

Birkhauser, United States, 2012. Paperback. Book Condition: New. Softcover Reprint of the Original ed.. 235 x 155 mm. Language: English Brand New Book ***** Print on Demand *****.This book is the first volume in a new series Progress in Gene Expression. The control of gene expression is a central-most topic in molecular biology as it deals with the utilization and regulation of gene information. As we see huge efforts mounting all over the developed world to understand the structure and organization of several complex eukaryotic genomes in the form of Gene Projects and Genome Centers, we have to remember that without understanding the basic mechanisms that govern the use of genetic information, much of this effort will not be very productive. Fortunately, however, research during the past seven years on the mechanisms that control gene expression in eukaryotes has been extremely successful in generating a wealth of information on the basic strategies of transcriptional control. (Although regulation of gene expression is exerted at many different levels, much of the emphasis in this series will be on transcriptional control. A future volume, however, will deal with other levels of regulation). The progress in understanding the control of eukaryotic transcription can only be appreciated by realizing that seven years ago we did not know the primary structure of a single sequence specific transcriptional activator, and those whose primary structures were available (e. g., homeo domain proteins) were not yet recognized to function in this capacity.
