

A Study of the Saturated Potassium Chloride Calomel Cell (Classic Reprint) (Paperback)

Filesize: 5.5 MB

Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.
(Felicia Nikolaus)

A STUDY OF THE SATURATED POTASSIUM CHLORIDE CALOMEL CELL (CLASSIC REPRINT) (PAPERBACK)

Brand New Book ***** Print on Demand *****.Excerpt from A Study of the Saturated Potassium Chloride Calomel Cell They were reblacked several times during the work, whenever any 2 gave a greater difference than 0.0002 volt. Compressed hydrogen was used exclusively; it was passed successively through alkaline permanganate solution, alkaline pyrogallate solution, water, and cotton wool to purify it; then through a hydrochloric acid solution of the same concentration as that employed in the hydrogen cell; the rate of flow was about 2 or 3 bubbles per second. Liquid Junctions. - The liquid junctions were made by dipping the ends of the siphon tubes of the component cells into a saturated solution of potassium chloride contained in a small beaker, the amounts of the solutions in all parts of a combination being so adjusted that all menisci were on the same level. At the beginning of the work small wooden plugs or toothpicks were used in the ends of the siphon tubes to prevent any mechanical mixing of the solutions. With these it was often found that duplicate measurements of a combination did not agree to a closer precision than 0.0005 volt. Investigation showed that this variation was due solely to the change in contact potential and not to any change in the value of the electrode potential; a conclusion which is confirmed by the fact that the loosening or tightening of the wooden plugs in the ends of the siphon tubes would cause an immediate change in the value of the combination. By using small cones of cotton wool fitted snugly, but not tightly, into the siphon tubes of all the cells of a combination, the present authors found that they could duplicate...
